Alexander Brown & Sons,  
Baltimore, Maryland,  
The First Boston Corporation,  
Boston, Massachusetts,  
B. J. Van Ingen & Company, Inc.,  
New York, New York,  
The State Roads Commission of Maryland,  
Baltimore, Maryland.

Sirs:

Relying on the provision contained in Article VI, Section 12 of the Trust Indenture, dated October 1, 1938, existing between the State Roads Commission of Maryland, and Safe Deposit and Trust Company of Baltimore, Trustee, securing State of Maryland Bridge Revenue 3-3/4% Bonds, Series "A", whereby the Chief Auditor of the State Roads Commission of Maryland must file with the Trustee, the Consulting Engineers, the original purchaser of bonds, certain financial and statistical data in connection with the operation of the Susquehanna River Toll Bridge, I present herewith such data as is thereby required, supplemented by other pertinent facts.

The Report concerning the operation of the Susquehanna River Bridge as a toll producing facility, is submitted to you in the following Exhibits and Schedules:

Exhibit No. 1 - Schedule of Toll Rates in force and effect, August 28 to September 30, 1940

Exhibit No. 2 -

Schedule No. 1 - Statement of Income for the period August 28 to September 30, 1940

Schedule No. 2 - Statement of Total Daily Traffic Transactions and Computed Value of Daily Traffic Transactions, August 28 to September 30, 1940

Schedule No. 3 - Statement of Computed Value of Total Daily Traffic Transactions and Corresponding Cash deposited - Over and Short

Exhibit No. 3 -

Schedule No. 1 - Statement of the Daily Number of Vehicle Transactions, by Classifications

Schedule No. 2 - Statement of Cash Transactions, Ticket Transactions, and Credit Transactions, by Classifications, and Total Transactions for Cash, Tickets, and Credits

OFFICE OF THE  
CHIEF AUDITOR

Exhibit No. 4 -

Schedule No. 1 - Statement of Daily Payments into Series "A" Bridge Revenue Fund

Schedule No. 2 - Statement of Collectors' Cash Errors and Axle Errors, and Result based on each 1,000 Transactions

Schedule No. 3 - Statement of Account, Series "A" Bridge Operation Fund

Schedule No. 4 - Statement of Series "A" Bridge Revenue Bonds Sinking Fund for the use of Reserve Interest Account

Exhibit No. 5 -

Schedule No. 1 - Statement of Payments from Operation Fund

Schedule No. 2 - Statement of Payments from State Roads Commission Funds made for and on account of Maryland Primary Bridge Program.

Exhibit No. 6 -

Schedule No. 1 - Balance Sheet, September 30, 1940 (Does not include Capital Sections, due to incomplete construction and final accounting for Construction Costs)

Schedule No. 2 - Susquehanna River Bridge Construction Fund

Exhibit No. 7 -

Schedule No. 1 - Bank Balances, Reconciliations, and Security Held by Trustee, Series "A" Bridge Revenue Funds

Exhibit No. 8 - Chart of Income - Susquehanna River Toll Bridge, and

Chart of Daily Vehicle Traffic - Susquehanna River Toll Bridge

C O M M E N T S

The Susquehanna River Toll Bridge was open to traffic at 4 P.M., Wednesday, August 28, 1940.

For simplicity, the complete period of time between 4 P.M., August 28, to midnight, August 31, 1940, has been annexed to the complete report for September, 1940, and the Financial Report, as well as the Statistical Report, here-with presented, therefore covers, as the accounting period, the days between August 28 and September 30, 1940.

TOLL RATES

The Toll Rates in effect and applying to all transactions during the period ended September 30, 1940, are those amended rates established by Coverdale and Colpitts, Traffic Engineers, as approved by J.E. Greiner Company, Consulting Engineers, and adopted by the State Roads Commission of Maryland.

The rates as originally prescribed and applied to vehicles embraced in Classification No. 9, have been clarified with respect to the type of vehicles

OFFICE OF THE  
CHIEF AUDITOR  
STATE ROADS COMMISSION  
OF MARYLAND

(continued)

October 22, 1940

in this classification. The descriptions of types of vehicles, and the accompanying rates are set forth on pages 2, 3, 4, and 5 of Exhibit No. 1.

INCOME

During the thirty-four day period, to September 30, 1940, the total computed toll income for reported traffic transactions, was \$75,787.75, based on total reported transactions of 344,141 vehicles. The average daily income was \$2,230.00, compared with \$1,159.00 established by the Traffic Engineers, annually.

The daily cost of complete debt service on the entire issue of \$6,000,000 of Series "A" Bridge Revenue Bonds, 3-3/4%, is \$1,055.00, including as a cost the entire amount reserved as the Operation Fund for both the Susquehanna and Potomac River Bridges. This last sum is based on an amortization of bonds during the established life term of thirty years.

The average daily cost of complete debt service on the entire issue of \$6,000,000 of Bonds, including the Operation Fund, but adding forty percent.(40%) of Interest and Principal, as provided in the Trust Indenture, will be \$1,422.00.

These facts and the daily income are presented graphically in Exhibit No. 8.

Attention must be directed to the fact, however, that during the thirty-four day period embraced in this Report, certain trends influencing traffic peaks, prevailed. Included are a portion of the Summer vacation periods; the Labor Day Holiday traffic; the Race Meet at Havre de Grace Race Track, Havre de Grace, Maryland, for the days September 14 to 28, 1940.

The daily rate of income, based on calculated worth of reported transactions, is shown in detail in Exhibit No. 2, Schedule No. 3. In this schedule is shown the value of computed transactions at \$75,787.75, whereas \$76,172.64 was remitted. The toll income remitted by Toll Collectors, is \$43.56 in excess of total transaction values, and is also \$58.67 less than computed values, resulting in excess funds of \$384.89, or 0.5% of total income.

All tolls collected daily and the proceeds of the sale of toll tickets, are deposited daily, but it became necessary to use certain toll funds for the purpose of establishing a Toll Change Fund at the Administration Building, Susquehanna River Bridge. As a consequence, a portion of the collections of September 22, 1940, amounting to \$4,009.31, have been retained for this purpose.

Toll collections are controlled automatically through the use of a treadle counter, supplemented by the collectors recording mechanically the classification of each vehicle. These actions are automatically and electrically controlled.

During the thirty four day period, there have been several failures of electric current supplied to the Administration Building and Toll Booths, and

OFFICE OF THE  
CHIEF AUDITOR  
STATE ROADS COMMISSION  
OF MARYLAND

(continued)

October 22, 1940

during such failure, obviously, no record is obtained of traffic transactions. In addition to these failures of electric current, on one occasion the mechanical recorders did not furnish a complete printed record of transactions. These factors are responsible for a portion of the excess fund remitted by the Collectors. Plans have been made for the immediate installation of an auxiliary or booster electrical plant.

VOLUME OF TRAFFIC, BY CLASSIFICATIONS, AND RELATED DATA

From the data presented on Exhibit No. 3, Schedules No. 1 and 2, much pertinent information may be obtained. The rates established by the Commission, subdivide the types of vehicles into ten classifications. Classifications No. 1, 2, and 10 include passenger cars, light commercial vehicles, and several types of the smaller class of vehicles; while Classifications No. 3, 4, 5, 6, 7, 8, and 9 include, generally, trucks, tractors, and trailers, and Commercial vehicles.

The total number of traffic transactions in Classifications No. 1, 2, and 10, were 287,657, or 83.6% of total traffic; whereas the total traffic transactions in Classifications No. 3, 4, 5, 6, 7, 8, and 9, were 56,484 vehicles, or 16.4% of total traffic.

The income from traffic transactions in Classifications No. 1, 2, and 10, was \$56,214.05, or 74.2% of total income, although attention must be directed to the fact that Classification No. 10 covers free or complimentary use of the bridge. The income from traffic transactions in Classifications No. 3, 4, 5, 6, 7, 8, and 9, was \$19,573.70, or 25.8% of total income.

Classification No. 10 records the transactions of free or complimentary users of the bridge, of which there were 2,399 transactions during the period.

Following the prescription set forth in the Indenture, free passage tickets have been restricted to employees of the State Roads Commission while engaged in Commission activities; to Members of the State Police; and to several other classes---few in number---who, by law, are permitted free use of the bridge.

In the adoption of Toll Rates by the Commission for the several classifications, only one commutation rate was provided, and that applied to Classification No. 2. The type of vehicle embraced in this Classification includes those set forth in Classification No. 1, and was intended to apply to the frequent users of the bridge, as a consequence of which the rate was established at fifteen cents ( $15\frac{1}{2}$ ) for each passage.

The average daily number of trips, exclusive of the traffic on Sundays, was 522; the average traffic applicable to the five Sundays in the period, was 323. As the users of commutation rated tickets are generally residents of Havre de Grace and Perryville, it would seem that the average daily use of the bridge, shown at 522, may be considered the local traffic between these two points.

In Exhibit No. 3, Schedule No. 2, are shown the number and percentage

OFFICE OF THE  
**CHIEF AUDITOR**  
STATE ROADS COMMISSION  
OF MARYLAND

(continued)

October 22, 1940

of each classification of vehicles and the money value of each. With respect to this data, the following facts are shown:

Classification	Percent Of Total Income	Percent Of Total Traffic
1	70.86	78.02
2	3.31	4.87
3	4.71	4.14
4	1.77	1.30
5	.28	.16
6	1.28	1.13
7	.49	.36
8	16.39	9.02
9	.92	.31
10	-	.69
Totals,	100.00%	100.00%

It is also interesting to note that of the total number of traffic transactions, 90.66% are paid in cash; 8.51% by the use of tickets; and .80% through credits extended. While the Commission has discouraged the use of the bridge on a credit basis, it is found that at times responsible users of the bridge do not furnish the operators of their vehicles with cash or tickets; consequently the cost of the passage has been charged.

Among the numerous users in the credit group, were several contracting firms engaged in constructing roadways adjacent to the Susquehanna River Bridge Approach, which necessitated the use of the bridge in hauling materials to these projects.

FUNDS

All funds collected are deposited daily to the credit of the Trustee into the Series "A" Bridge Revenue Fund. This applies to all toll collections and to proceeds of the sale of tickets at the Administration Building, Perryville, and to the proceeds of the sale of tickets at the Commission's head office, Baltimore.

Previously, reference has been made to the sum of \$384.89, representing net amounts remitted by Toll Collectors in excess of computed value of tolls as reported by them. In Exhibit No. 4, Schedule No. 2, is set forth the record of each Toll Collector and Toll Sergeant during the period. The accuracy record of each is computed on the basis of errors in recording numbers of axles per 1,000 transactions, and cash errors on the basis of twenty cents (20¢) or less (the minimum cash toll collected) being the equal of one cash error. The axle errors per 1,000 transactions show a minimum of 2.8 errors and a maximum of 22.8 errors per 1,000 vehicle transactions, resulting in an average of 9.3 errors per 1,000.

The cash errors show a minimum of .9 errors per 1,000 transactions, and

OFFICE OF THE  
CHIEF AUDITOR  
STATE ROADS COMMISSION  
OF MARYLAND

(continued)

October 22, 1940

a maximum of 29.8 errors, resulting in an average of 10.7 errors in cash per 1,000 transactions.

Comparing these results with the results obtained at other toll bridges operated and controlled with similar equipment, both the axle error and cash error results must be considered high, particularly if consideration is given to the results of each individual Toll Collector and Toll Sergeant.

By the terms of the Trust Indenture, transfers of funds are to be made within ten days after the close of each month, into the several funds thereby created. As the present report for the month ended September 30, 1940, is the first one submitted after the first month's complete operations (the four days August 28 to 31, being considered as part of September), these transfers of funds could not have been made at the close of September, 1940.

It is a fact, however, that during the ten day period, October 1 to 10, 1940, there has been transferred from the Series "A" Bridge Revenue Fund to the Operation Fund, the sum of \$6,741.94, of which \$3,575.27 applies to the period August 28 to September 30, 1940, and \$3,166.67 to the month of October. The latter sum is one-twelfth of the amount established as the Operation Budget for the year to end September 30, 1941.

It is likewise a fact that during the first ten days of October, there was transferred from the account "Series 'A' Bridge Revenue Fund", the balance of cash then in bank to the credit of the account, after transferring the Operation Fund, the sum of \$60,382.24 into the account "Series 'A' Bridge Revenue Bonds Sinking Fund" for the use of Reserve Interest Account.

The State Roads Commission of Maryland has also prepared its voucher in the amount of \$750.00 intending thereby to pay from State Funds into the Reserve Account for Bridge Repairs, an equivalent amount. This is the initial payment of a similar amount to be paid into the Reserve Account each month, as estimated by the Consulting Engineers.

It is apparent, therefore, that all requirements in connection with the transfer of funds at the close of each month, and in the establishment of these several funds, in accordance with the terms of the Indenture, have been complied with.

Because the Operation Fund was not established until after September 30, 1940, but was established within ten days after this date, no payments have been made therefrom. Those costs properly chargeable to the Operation Fund, as established by the Operation Budget, and applicable to the period August 28 to September 30, 1940, have been paid from State Funds, and will be recovered from the Operation Fund during the month of October.

Article IV, Section 12 of the Trust Indenture, provides a plan for reimbursing the State Roads Commission the amounts paid from Commission's funds for maintaining, repairing, and operating the Bridges. Reimbursement is to be made from any balance remaining in the Sinking Fund or any other fund, after provision shall have been made for the payment of all bonds and interest, and all

OFFICE OF THE  
CHIEF AUDITOR  
STATE ROADS COMMISSION  
OF MARYLAND

(continued)

October 22, 1940

expenses and charges required to be paid.

If the then balance in the funds are not sufficient, tolls shall thereafter be charged until the amount due the Commission shall be fully reimbursed.

In Exhibit No. 5, Schedule No. 2, is shown the total amount of State Roads Commission funds disbursed in connection with the Primary Bridge Program of Maryland, and it will be found that a total of \$229,443.69 has been expended to August 31, 1940, and that \$71,995.60 has been received by the State Roads Commission from the Susquehanna River Bridge Construction Funds and from the Potomac River Bridge Construction Funds, and applied to this total sum, leaving a remainder of \$157,448.09.

BALANCE SHEET AND CONSTRUCTION FUNDS

The Balance Sheet at September 30, 1940, herein presented as Exhibit No. 6, does not include the capital sections, due to the uncompleted construction and the final accounting for construction costs.

The final requisition to the United States Government for the payment of Grant, applicable to the Susquehanna River Bridge, cannot be prepared until the total final costs of construction are determined.

For informative purposes only, there is presented in Exhibit No. 6, Schedule No. 2, financial data in connection with the Construction Account of the Susquehanna River Bridge, showing total expected completion costs, based on latest estimates; funds made available to this project from bond proceeds and Federal sources; total disbursements and incurred costs to September 30, 1940; and cash on hand and in banks; and the security held by the Trustee for each depository.

BRIDGE REVENUE BONDS

At October 1, 1938, the State Roads Commission of Maryland issued and sold \$6,000,000 of "Bridge Revenue 3-3/4% Bonds, Series 'A'", the proceeds of the sale being allotted to and to be used to satisfy construction costs of those items payable from the Susquehanna River Bridge Construction Fund and the Potomac River Bridge Construction Fund.

Up to September 30, 1940, no bonds had been redeemed, consequently there were \$6,000,000 of Bridge Revenue 3-3/4% Bonds, Series "A" outstanding at this date.

The increments of revenue placed in the Sinking Fund for the use of Reserve Interest Account, had not been sufficient, in amount, for one year's interest, so that no funds were transferred to the Sinking Fund direct and, as a consequence, no bonds were purchased to September 30, 1940.

BANK BALANCES

On Exhibit No. 7 are shown the cash balances on hand in depositories

OFFICE OF THE  
**CHIEF AUDITOR**  
STATE ROADS COMMISSION  
OF MARYLAND

(continued)

October 22, 1940

carrying Series "A" Bridge Revenue Funds; Reconciliations to bring into agreement the balances as shown on the books of the State Roads Commission; and the Securities held by the Trustee and pledged by depositories carrying Series "A" Bridge Revenue Funds and other funds created under the Indenture.

CHARTS

On the two charts comprising Exhibit No. 8, are depicted the total daily traffic and daily income. On the Income section of the charts are shown a comparison between total present income, which includes income from the Susquehanna River Bridge only, and the daily average established by the Traffic Engineers; the cost of Debt Service on a thirty year basis; the average daily cost of Debt Service and Operation Fund, plus forty percent. (40%) of Interest and Principal, as required by the terms of the Trust Indenture; and the average daily income during the period.

Very truly yours,

Chief Auditor.

Classification and Effective Rates for  
 Vehicles described in Classification No. 9

Classification No. 9 embraces four (4) distinct classes of vehicles, and there are set forth below the rates applicable to the types of vehicles in each of these four groups.

Group No. 1 - Tractor and Trailer - Four (4) Axles.

A Tractor and Trailer, four (4) Axles, shall receive:

A TRACTOR or two (2) Axles, or a TRAILER of three (3) Axles, hauling a full trailer of two (2) Axles, or hauling a semi-trailer of one (1) Axle, a total of four (4) Axles on the TRACTOR and TRAILER, or it shall make a TRAILER of two (2) Axles hauling a full trailer with two (2) Axles, a total of four (4) Axles on the TRACTOR and TRAILER.

Established rate for all units of this description, \$0.40.

Group No. 2 - Passenger Car and Trailer - Four (4) Axles

This classification shall recognize all Passenger Cars with two (2) Axles, hauling a trailer with two (2) Axles, a total of four (4) Axles on the Passenger Car and the trailer.

Established rate for all units of this description, \$0.40.

Group No. 3 - Power Shovel, Contractor's Equipment and Machinery

All vehicles properly described by the terms "Power Shovel", "Contractor's Equipment" and "Machinery", are subject to an inspection charge of One Dollar (\$1.00), and must pay a toll rate based on determined weight at the Toll Bridge, of Ten Cents (\$0.10) per Ton for each ton up to 20 Tons, and Twenty Cents (\$0.20) for each ton over 20 tons. If vehicles entering this classification are not subject to a load or carrying capacity, and whose weight is unknown, and if the inspection charge of One Dollar (\$1.00) has previously been made, the Inspection Charge there-

Group No. 3 - Power Shovels, Contractor's Equipment and Machinery (combined)  
after need not apply, and the toll shall be established on the weight basis only.  
Group No. 4 - Tractor and Semi-Trailer and Trailer carrying unusually heavy loads

Vehicles described in this group are segregated in the following classes, and an established rate assigned to each:

CLASS "A" ~ Tractor with two (2) Axles, hauling a Semi-Trailer of two (2) or more Axles (Total four (4) Axles or More) ~

Composition of Toll Rate:

Tractor,	00.25
Trailer,	00.40

Established Total Toll Rate, Class "A" Vehicles, \$0.65

CLASS "B" ~ Tractor with two (2) Axles, hauling full Trailer of two (2) or more Axles (Total four (4) Axles or More) ~

Composition of Toll Rate:

Tractor,	00.25
Trailer,	00.40

Established Total Toll Rate, Class "B" Vehicles, \$0.65

CLASS "C" ~ Truck with two (2) Axles, with full Trailer of two (2) or more Axles (Total four (4) Axles or More) ~

Composition of Toll Rate:

Truck,	00.40
Trailer, two (2) or more Axles,	00.40

Established Total Toll Rate, Class "C" Vehicles, \$0.80

CLASS "D" ~ Tractor with three (3) or more Axles, with a Semi-Trailer of one (1) or more Axles (Total four (4) Axles or More) ~

Composition of Toll Rate:

First Full Trailer, two (2) or more Axles,	\$0.40
Second Full Trailer, two (2) or more Axles,	\$0.40

Established Total Toll Rate, Class "P" Vehicles, \$1.45

In establishing the rates hereinabove set forth, it is ordered that if any of the  
above described vehicles in Group No. 4 should be so heavy laden as to constitute  
a unit hauling unusually heavy loads, then the above rates shall not apply to  
such selected vehicle, but each unit of this kind shall be subjected to an in-  
spection, and weighed, and the toll computed at the rates of \$1.00 for the in-  
spection, plus Ten Cents (\$0.10) per Ton up to 20 Tons, and Twenty Cents (\$0.20)  
per Ton for each Ton over 20 Tons of the determined weight.

SUSQUEHANNA RIVER TOLL BRIDGE

STATEMENT OF ACCOUNT  
SERIES "A" BRIDGE OPERATION FUND

The Trust Indenture provides, Article IV, Section 5,

"On or before the 10th of each month after any of said bridges shall be opened to traffic, it shall be the duty of the Trustee to transfer from the Bridge Revenue Fund into a special fund which is hereby created and designated 'Series A Bridge Operation Fund'...the amount required by the Operation Budget to be set aside into said Fund during each month."

Relying on the Operation Budget, submitted by the Consulting Engineers and approved by the State Roads Commission, the sum of \$38,000.00 per year has been allocated to the Susquehanna River Bridge Series A Operation Fund.

At October 30, 1940, the first month after the Susquehanna River Bridge was opened to traffic, the Trustee did transfer one-twelfth (1/12) of \$38,000.00 from Series A Bridge Revenue Fund to Series A Operation Fund, the sum of \$3,275.27 applicable to the period August 28, 1940, the date the bridge was opened to traffic, to September 30, 1940.

This amount, therefore, is shown as a Reserve of Funds from Series A Bridge Revenue Fund as appears in the Statement of Income, Exhibit No. 2, Schedule No. 1.

REGULAR PAYROLL ACCOUNT

The State Roads Commission, Article IV, Section 6.

"On or before the 10th day of each month (and immediately after the transfer of money into the Special Fund, as required by Section 5 of this Article), so shall be the duty of the Trustee to transfer from the Bridge Revenue Fund into a special fund which is hereby created and designated "Bonds A Bridge Revenue Fund" an amount equal to the amount of all money in the Bridge Revenue Fund on the last day of the preceding month, after deducting the amount of the transfer required by Section 5 of this Article (see Schedule No. 4, Schedule No. 3).

All money so transferred and placed in the Bridge Fund shall be credited to a special account designated "Bridge Interest Account" until the amount so held account shall be equal to one year's interest on Bonds then outstanding.

State of Maryland Bridge Revenue 3-3/4% Bonds, Series "A", outstanding September 30, 1920, were \$6,000,000 as of 3-3/4%, plus Annual Interest.

Article IV, Section 13, of the Trust Indenture provides:

"After provision shall be made for the payment of all bonds secured hereby and the interest thereon, and all expenses and charges herein required to be paid, the Trustee shall pay any balance in the Sinking Fund and any balance in any other fund to the Commission. The amounts so paid to the Commission shall be deemed to constitute a partial reimbursement of the amounts theretofore expended by the Commission under the provisions of this Indenture for maintaining, repairing, and operating the bridges. And tolls shall thereafter be charged, if not prohibited by any Federal law or any law of the State, for the use of such bridges until the balance of the amount so expended by the Commission shall be fully reimbursed to the Commission."
