

Attention Boaters...

Please slow down...your wake could cost lives!

The Nice/Middleton Bridge is now under construction. Many boaters are speeding through the construction area creating large wakes. This is a major hazard for workers who are working on the river or are in manlifts 175 feet in the air. Large wakes cause work platforms to swing violently. This can also be hazardous to boaters as they travel the waterway.

MAKE NO WAKE

Please help ensure everyone's safety in the construction area:

- Slow down
- Use extreme caution
- Steer clear of construction vessels
