

# Notice to Roseland Road Neighbors

## Roseland Road/ US 301 Intersection Realignment

In the coming weeks, Roseland Road will be realigned approaching the US 301 intersection to allow for US 301 improvements leading up to and including the new Nice/Middleton Bridge. US 301 will temporarily be reduced to two lanes (one in each direction) at the intersection during the construction period. Weather permitting, the new intersection configuration is estimated to be completed this summer.

When the new bridge opens, US 301 will offer travelers four lanes (two in each direction) as it passes Roseland Road. For safety reasons, the final configuration will not include a left turn lane exiting Roseland Road onto US 301 North. Travelers exiting Roseland Road and bound for the Nice/Middleton Bridge will turn right onto US 301 South, proceed a third of a mile, and make a U-turn at Barnesfield Road.
